

Nawanshu Lahane

Chhatrapati Sambhajinagar, Maharashtra, India nawanshulahane2005@gmail.com
— +91 7709182261 — linkedin.com/in/nawanshulahane

Research Objective

Computer Science undergraduate with hands-on experience in machine learning , NLP pipelines, full-stack AI system design, and data science . Passionate about applied research at the intersection of deep learning and real-world impact – particularly in misinformation detection, multimodal AI, and data-driven systems . Seeking the Google Student Researcher role to contribute to large-scale research challenges alongside world-class scientists.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering Jan 2024 – Jan 2027 (Expected)

Maharashtra Institute of Technology, Sambhajinagar, Maharashtra

Affiliated to Dr. Babasaheb Ambedkar Marathwada University

Honours: Cloud Computing (Dr. Babasaheb Ambedkar Marathwada University)

- **Relevant coursework:** Data Structures & Algorithms, Database Systems, Computer Networks, Operating Systems
- **Currently Pursuing Data Science with Python (SSI)** – Covering NumPy, Pandas, Scikit-learn, ML & Deep Learning , Power BI and Advanced Excel

Technical Skills

- **Programming:** Python (Intermediate) , C , Java (Basics) , JavaScript (Basics)
- **AI / ML / NLP:** Scikit-learn, TF-IDF, Logistics Regression , Naive Bayes, Text Classification , Feature Engineering, Whisper (ASR), EasyOCR
- **Data Science:** NumPy, Pandas, Matplotlib, Seaborn, EDA, Data Cleaning, Statistical Analysis , Jupyter Notebook
- **Backend / APIs:** Fast API, Flask, REST API design , SQLite
- **Frontend:** React, HTML, CSS, Streamlit
- **Cloud & DevOps:** AWS (EC2, S3, Cloud Practitioner), Git , GitHub, FFmpeg
- **Embedded / IoT:** Embedded Systems Programming , Sensors, DC Motors , Automation Components

Internship Offers / Upcoming Experience

Full Stack Development Internship – Selected (CodeAlpha)

- Selected for the Full Stack Development Internship – Focus on hands-on application of web development and software engineering concepts.

Embedded Systems Internship – Selected (Emertxe Information Technologies, Bangalore)

- Online Internship focusing on core Embedded Systems Programming / Electronics / IoT domain.

Academic Projects

Real-Time Misinformation Detection on Short Video Content (AI/ML Major Project)

- Building an AI-powered system (in progress) to detect misleading information in short-form videos (reels, shorts, social media clips) as a college major project.
- Extracted audio from videos using FFmpeg and converted speech to text using OpenAI Whisper (ASR).
- Implemented NLP preprocessing pipeline: tokenization, stop-word removal, and TF-IDF vectorization for feature extraction.
- Trained and evaluated Logistic Regression and Naive Bayes classifiers to categorize content as safe or risky.
- Built REST APIs using FastAPI/Flask with SQLite for data storage and a React-based frontend for video upload and prediction visualization.

Online Code Judge System (Full Stack Project)

- Built an Interactive Coding Platform using Python,Streamlit and subprocess for real-time code execution.
- Implemented automated test case evaluation,submission history and a leaderboard for instant performance tracking.
- Designed an responsive interface for solving programming problems with immediate feedback on code submission.

Automatic Vegetable Cutting Machine (Hardware project)

- Designed an automated cutting system using sensors, DC motors, and a mechanical cutting mechanism.
- Integrated basic electronic components for sensor-based control and automation.
- Gained hands-on experience in hardware assembly, testing, and real-time problem solving.

Student Result Management System (Full Stack Project)

- Built a full-stack application using Python, Streamlit, and SQLite.
- Implemented secure authentication, result analytics, and automated report generation.
- Designed for efficient academic data management for students and faculty.

Certifications

- **Artificial Intelligence (Certificate of Excellence)** – Beep Leaning (Google for Startups Accelerator Partner, Shark Tank India) , June 2026
- **Exploratory Data Analysis with Python & GenAI** – Analytics Vidhya | March 2026
- **Introduction to Vibe Coding** – Microsoft | February 2026
- **Artificial Intelligence in Industrial and Management Engineering** – NPTEL (IIT Kanpur), Elite Certification, 75% (Aug–Oct 2025)
- **AWS Cloud Practitioner Essentials** – Amazon Web Services (Coursera), July 2025
- **Generative AI for Beginners** – Simplilearn SkillUp, July 2025
- **Python for Beginners** – Simplilearn SkillUp, September 2024
- **English Communication Mastery** – Infinova Eduventures (Webinar), September 2025

Ongoing Courses

- **Data Science with Python** – Software Solution Institute (SSI) | 2026 (In Progress)
- **Modules**– Python, NumPy, Pandas, EDA, Statistics, ML(Supervised & Unsupervised), Deep Learning , SQL, Streamlit/Flask deployment

Research Interests

Natural Language Processing , Misinformation & Fact-Checking, Multimodal AI, Data Science & Machine Learning , Embedded & IoT Systems, AI for social Good

Soft Skills

- Problem Solving and Logical Thinking
- Clear Communication and Presentation
- Team Collaboration
- Willingness to Learn and Adapt

Additional Information

- Current Status: Third-year undergraduate engineering student
- Availability: Open to Summer and Semester-long Internships
- Languages: English, Hindi, Marathi
